NetDania FinTech Solutions

Interbank FX Feed

The NetDania Feed

NetDania provides a tradable FX feed which includes 50+ spot currencies & gold/silver spot rates against major currencies. All our rates are derived exclusively from Tier-1 Liquidity Providers, and the feed typically shows very tight spreads. It has a high update frequency, and a low latency - fully matching that of more expensive data providers. NetDania operates redundant server setups with crossborder fail-over capabilities.

Versatility

The NetDania feed can be deployed for a number of applications and roles. The wide range of delivery options makes the feed a safe and flexible choice for many different institutions and companies, such as FX brokers, financial websites, corporate FX businesses, and more.

Terms

The feed is available on a 12 months contract with payment 3 months in advance. NetDania pricing is competitive, and dependent on the number of instruments you chose to subscribe to. Contact us for a quote and more details.

Our FinTech Solutions

NetDania offers a wide range of solutions, including financial workstations and information terminals, trading platforms, charts and applications for both desktop, mobile and website use.

NetDania solutions are feature-rich and cost-efficient through their flexibility and modularity. They come with extensive branding and hosting options.

The NetDania applications include the world's highest user rated mobile app within finance, and the world's fastest HTML5 chart.

About NetDania

Founded in 1998, NetDania pioneered streaming price technology, and have since delivered solutions to global Tier-1 banks, brokers, currency managers, and analysts. With a strong position within corporate FX and trading, our technologies are increasingly used by banks, brokerages and analysts as better alternatives to expensive legacy systems for trading, news and analysis.

At NetDania, we take a Scandinavian approach to our work with a keen eye for design and with punctuality and mutual trust as our key values.
